

Question and Answers about Covid

Version:	1.1
Datum:	27.06.2021

Corona-Check

Question:

How does the Corona-Check work?

Answer:

All participants and accompanying people have to go through the Corona-Check before the Check-In. At the Corona-Check the Covid-Certificate (vaccinated, tested or recovered from Covid) will be checked. Those who present a valid Covid-Certificate receive a control bracelet. Those who cannot present a valid Covid-Certificate can take a rapid antigen test in our test centre. Those who present a negative test result at the Corona-Check have to undergo a second rapid antigen test on Wednesday July 21st 2021 in our test centre in Arosa.

Question:

I have symptoms, do I have to get tested in Arosa?

Answer:

No, people with symptoms must not travel to Arosa under any circumstances.

Question:

How does the verification of the Covid-Certificate work?

Answer:

The Covid-Certificate will be verified with the Covid-Certificate Check App.

Question:

Will foreign Covid-Certifications be accepted?

Answer:

The Covid-Certificate of the EU will be accepted.

Question:

Do children also have to present a valid Covid-Certificate?

Answer:

Children up to and including the age of 16 (D/H16) do not need a valid Covid-Certificate. But children also need to go to the Corona-Check to get a valid control bracelet.

Question:

Is the control bracelet valid during all stages of the Swiss O Week?

Answer:

For Participants who have according to the Covid-Certificate been fully vaccinated or recovered from Covid the control bracelet is valid during all stages of the Swiss O Week. Participants who present a Covid-test at the Corona-Check have to undergo a second rapid antigen test on Wednesday July 21st 2021 in our test centre in Arosa. Afterwards the participants will receive a new control bracelet.

Question:

Can I also go to the Corona-Check after the Check-In?

Answer:

No. There will be an access control, i.e. only participants with a valid control bracelet will have access to the Check-In.

Corona-Test

Question:

Who has to show a Corona-Test at the Corona-Check?

Answer:

All participants and accompanying people who have according to the Covid-Certificate not yet been fully vaccinated or recovered from Covid have to show a Corona-Test at the Corona-Check.

Question:

Do I need a PCR-Test or is a rapid antigen test carried out by trained personnel sufficient?

Answer:

A rapid antigen test is sufficient, but it cannot be older than 48 hours.

Question:

I travel to Arosa after stage 1 but before stage 3. I am not vaccinated or have recovered from Covid. Do I also have to get tested a second time on the rest day.

Answer:

Yes.

Question:

I cannot take a test before arriving in Arosa. Where can I get tested in Arosa?

Answer:

The Corona-Test can be taken in several pharmacies in Chur.

There will also be a test centre in Arosa where rapid antigen test can be taken. The costs of the rapid antigen test are subject to current negotiations with the Canton Graubünden.

Question:

Where can I get tested during the Swiss O Week in Arosa?

Answer:

There will be the possibility to test during the rest day of the Swiss O Week. The costs of the rapid antigen test are subject to current negotiations with the Canton Graubünden.

Corona-Vaccination

Question:

If I am not yet fully vaccinated by the time the Swiss O Week starts, can I still participate?

Answer:

Yes, but since the vaccination is not valid yet, a Covid-Test has to be taken.

Access Control

Question:

Is there an access control to the stages?

Answer:

There will be no access control to the competition centre. On the way to the start, however, the control bracelet must be presented. No start without valid control bracelet.

Mask-wearing requirement

Question:

Does a mask-wearing requirement still apply after the latest decisions of the Federal Council?

Antwort:

Our precautionary measures include a mask-wearing requirement if a distance of 1.5 meters cannot be maintained. For example, at the start or while using public transport.
